

HAFSA ABDUL RAZAQ

hafsaabdulrazaq333@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | Punjab, Pakistan

SUMMARY

Frontend Developer with hands-on experience building modern, responsive web applications using **React.js** and practical full-stack architectures with **Flask and Python**. Skilled in translating ideas into clean, scalable digital experiences, with growing expertise in **machine learning integration** and **AI-powered solutions**, including generative AI and prompt engineering. Proficient in **JavaScript (ES6+)**, **React JS**, **Python**, **Flask**, **SQLite**, and modern deployment tools such as **Vercel and Render**.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React JS, Responsive Web Design

Backend: Python, Flask, REST APIs

Database: SQLite

Machine Learning & AI: Predictive Modeling, PDF Report Generation, Prompt Engineering, AI Image Generation, ML-Powered Applications

Deployment: Vercel, Render

Tools: Git, GitHub, VS Code, Trae AI, CHATgpt, GitHub Copilot

EXPERIENCE

Frontend Developer Intern

Datalabb | Lahore, Pakistan

- **Contributed** to the development of **LingoFlow AI**, a multilingual web application, building a fast, accessible **Streamlit** interface for text translation and summarization.
- Integrated **Python-based API workflows** to handle real-time translation and summarization requests, focusing on speed and reliability.
- Collaborated with backend engineers to refine **UI/UX** and API response handling, ensuring a smooth end-to-end user experience.

SELECTED PROJECTS

FurniSense AI | [GitHub](#)

React, API Integration, Prompt Engineering, AI Image Generation

- Built an **AI-powered furniture and interior design platform** that transforms user preferences into premium, photorealistic furniture designs.
- Applied **prompt engineering** and **AI image generation APIs** to deliver personalized, high-quality visual outputs within a responsive React interface.

HealthGuard AI | [GitHub](#)

React, Python, Machine Learning, PDF Reports

- Built a **machine learning-powered diabetes prediction platform** with automated **PDF report generation** and a polished clinical feel.
- Designed a clean, responsive React interface for presenting prediction results in an accessible and professional format.

Full Stack Todo Application | [GitHub](#)

React, Flask, SQLite, CRUD

- Developed a **task management application** with full CRUD functionality using React, Flask, and SQLite for a clean and practical workflow experience.

LingoFlow AI | [GitHub](#)

Streamlit, Python, API, UI/UX

- Built a **multilingual web application** focused on fast text translation and summarization with a smooth, accessible interface.

Weather Application | [GitHub](#)

Streamlit, Python, API, Responsive

- Created a **responsive weather forecasting application** with live API integration and dynamic visual updates.

CERTIFICATIONS

Google AI Essentials

Google

- Gained practical knowledge of **generative AI, prompt engineering, responsible AI**, and real-world AI applications for productivity and problem-solving.

EDUCATION

BS in Computer Science

University of Gujrat | CGPA: 3.1/4.0 | Gujrat, Pakistan

Intermediate (Computer Science)

Punjab College | Grade: A+ | Wazirabad, Pakistan

Matriculation (Science Group)

Dar-e-Arqam School | Grade: A+ | Wazirabad, Pakistan
